

# ClinNext 10 2015 Edition Certified Health IT Costs & Limitations Disclosure

The Health IT Modules listed herein are 2015 Edition compliant and have been certified by Drummond Group, an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.

To obtain more information about how Sabiamed’s solutions meet the ONC 2015 Edition certification standards, please contact us at (787) 653-7000, [info@sabiamed.com](mailto:info@sabiamed.com), or write us at: P.O. Box 6150, Caguas PR 00726-6150.

Note that varying degrees of costs will need to be incurred related to professional services to support new implementations and upgrades, depending on the election of the customer under their contractual agreement with Sabiamed Corporation.

## CinNext 10 v.1.0 Cost and Limitations

Certified Capability	Description	Relied Upon 3 <sup>rd</sup> party software	Applicable Fees & Costs	Limitations
§170.315(a)(1) CPOE-Medication	Provides the capability to electronically access, record, and change, a patient’s medication orders list.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(a)(2) CPOE-Laboratory	Provides the capability to electronically access, record, and change a patient’s laboratory orders list.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(a)(3) CPOE-Imaging	Provides the capability to electronically access, record, and change, a patient’s diagnostic imaging orders.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None

<p>§170.315(a)(4) Drug-drug, Drug-allergy Interaction Checks</p>	<p>Provides the capability to detect and alert end-users of drug-drug and drug-allergy interactions when placing medication orders.</p>	<p>Wolters Kluwer Medispan v.4.0</p>	<p>License and support fees for third party products will be charged to client annually, based on number of beds for hospitals or number of facilities for ambulatory clinics. These costs are in addition to ClinNext 10 v.1.0 licensing, annual maintenance &amp; support, and implementation fees that client would pay to purchase (or upgrade to) the EHR certified technology.</p>	<p>None</p>
<p>§170.315(a)(5) Demographics</p>	<p>Provides the capability to electronically access, record, and change patient demographic information including race, ethnicity, gender, and gender identity.</p>	<p>None</p>	<p>Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).</p>	<p>None</p>
<p>§170.315(a)(6) Problem List</p>	<p>Provides the capability to electronically access, record, and change a patient's problems list ( codified using the SNOMED-CT vocabulary).</p>	<p>None</p>	<p>Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).</p>	<p>None</p>
<p>§170.315(a)(7) Medication List</p>	<p>Provides the capability to electronically access,</p>	<p>None</p>	<p>Requires license, annual maintenance, and</p>	<p>None</p>

	record, and change a patient's active medications list (codified using the RxNorm vocabulary).		software implementation fees for Certified Health IT product (ClinNext 10).	
§170.315(a)(8) Medication Allergy List	Provides the capability to electronically access, record, and change, a patient's active medication allergy list.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(a)(9) Clinical Decision Support	Provides the capability to configure CDS interventions inclusive of source attribute information to be presented to end-users based on clinical data in the Electronic Health Record (EHR), as well as diagnostic and therapeutic reference material using the "Infobutton" standard.	Truven Micromedex Clinical Knowledge v.5.27.0	License and support fees for third party products will be charged to client annually, based on number of beds for hospitals or number of facilities for ambulatory clinics. These costs are in addition to ClinNext 10 v.1.0 licensing, annual maintenance & support, and implementation fees that client would pay to purchase (or upgrade to) the EHR certified technology.	None
§170.315(a)(10) Drug-Formulary Checks	Provides the capability to automatically query for the existence of a drug formulary or preferred drug list for a patient and medication.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None

§170.315(a)(11) Smoking Status	Provides the capability to electronically access, record, and change a patient's smoking status.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(a)(12) Family Health History	Provides the capability to electronically access, record, and change a patient's family health history using SNOMED-CT vocabulary.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(a)(13) Patient-specific Education Resources	Provides the capability to suggest patient education resources based on a patient's documented problems and medications, using the "Infobutton" standard.	Truven Micromedex Care Notes v.5.27.0  MedLine Plus	License and support fees for third party products will be charged to client annually, based on number of beds for hospitals or number of facilities for ambulatory clinics. These costs are in addition to ClinNext 10 v.1.0 licensing, annual maintenance & support, and implementation fees that client would pay to purchase (or upgrade to) the EHR certified technology.	None
§170.315(d)(1) Authentication, Access Control, Authorization	Provides unique user identification, enables authentication, and	None	Requires license, annual maintenance, and software	None

	prevents unauthorized access (using username/password) to electronic health information, and includes the capability to configure the specific user access level.		implementation fees for Certified Health IT product (ClinNext 10).	
§170.315(d)(2) Auditable Events and Tamper Resistance	Provides audit event creation capabilities for security auditing of access to ClinNext 10.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(d)(3) Audit Report(s)	Provides the capability to create sortable audit reports for specific time frames, and based on specific parameters such as Login ID, Patient ID, type of action, timeframe, etc.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(d)(4) Amendments	Provides the capability to record patient amendment requests, as well as information of whether the amendment was approved or denied.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(d)(5) Automatic Access Time-Out	Provides a mechanism for automatic session termination due to inactivity, requiring re-authentication to re-gain access to the system.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None

§170.315(d)(6) Emergency Access	Enables to configure a limited set of specified users to access electronic health information and certain functionalities in emergency scenarios.	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(d)(7) End-user Device Encryption	The product is designed to prevent any persistent storage of electronic health information/data to end-user devices (e.g. temp. files, cookies, etc.).	None	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).	None
§170.315(d)(8) Integrity	Enables verification that health information exchanged electronically has not been modified during transmit via use of message digests produced by hash algorithms of SHA-2 or greater strength.	256 bit SSL Certificate (installed on IIS/WebServices)	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10). It also requires the installation of a 256 bit SSL certificate on the Web-Services server.	None
§170.315(d)(9) Trusted connection	Enables the secure encryption and integrity-protection of electronic health information transmitted to external applications via ClinNext 10 API modules.	256 bit SSL Certificate (installed on IIS/WebServices)	Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10). It also requires the installation of a 256 bit SSL certificate on the Web-Services server.	None

<p>§170.315(b)(2) Clinical Information Reconciliation and Incorporation</p>	<p>Provides the capability to accurately match a received transition of care C-CDA document to a local patient record and to reconcile medication allergies, problems, and medications data to produce a single consolidated reconciled list in the patient's Electronic Health Record (EHR). Reconciled data can be subsequently included in generated transition of care C-CDA documents.</p>	<p>None</p>	<p>Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).</p>	<p>None</p>
<p>§170.315(c)(1) Clinical Quality Measures – record and export</p>	<p>Provides the capability to record the data required for Clinical Quality Measure (CQM) calculations as codified entries, and provides the ability for an authorized user to generate QRDA Category I data files for export.</p>	<p>None</p>	<p>Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).</p>	<p>None</p>
<p>§170.315(c)(2) Clinical Quality Measures – import and calculate</p>	<p>Provides the capability for an authorized user to import QRDA Category I data files and perform Clinical Quality Measure (CQM) calculations for the data for the measures to which the product is certified.</p>	<p>None</p>	<p>Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).</p>	<p>None</p>

<p>§170.315(c)(3) Reserved for Clinical Quality Measures - report</p>	<p>Provides the capability to create QRDA Category I and III data files for reporting submission for the measures to which the product is certified.</p>	<p>None</p>	<p>Requires license, annual maintenance, and software implementation fees for Certified Health IT product (ClinNext 10).</p>	<p>None</p>
<p>§170.315(g)(3) Safety-enhanced Design</p>	<p>Defines user-centered design processes and assessments for applicable certified capabilities within the certified product's scope.</p>	<p>N/A</p>	<p>N/A</p>	<p>N/A</p>
<p>§170.315(g)(4) Quality Management System</p>	<p>Defines controls for and monitors compliance with the quality standards under which the certified capabilities are developed, tested, implemented, and maintained.</p>	<p>N/A</p>	<p>N/A</p>	<p>N/A</p>
<p>§170.315(g)(5) Accessibility- Centered Design</p>	<p>Defines the processes by which the accessibility standards employed in the development of the certified capabilities.</p>	<p>N/A</p>	<p>N/A</p>	<p>N/A</p>
